

# TrueBlend™

## When precision and ease of use count!

Every model of TrueBlend gravimetric batch blenders from Conair is designed to provide users with highly precise blend integrity, ease of use, superior cleaning features and unprecedented reporting capabilities. Blend from two to 12 ingredients, up to 12,000 pounds per hour, beside the machine or on the throat, and let the SmartBlend control keep track of 250 material names and 1000 recipes for you along with integrated control of vacuum loading. Plus, new TrueBlend improvements make it the best value in multi-component blenders available anywhere.

Conair's new SQL reporting software enables easy, precise tracking and documentation of your material usage.

How do you like your reports? Only the SmartBlend control can deliver the information you need for your business

### NEW FEATURES

- **One-piece mixing chambers**

No more puzzle pieces; the TrueBlend mixing chamber is easily removed and cleaned as a single unit. Cleaning has never been faster.

- **Simplified batch hopper removal and replacement**

No fumbling; Helpful guides move the batch hopper in and out of position easily. Some models even accommodate one hand removal!

- **Feed forward dosing algorithm**

A huge jump in precision and metering speed by dosing to the target weight instead of guessing and correcting. Accuracy is now measured on each batch; not across multiple batches.

- **Multiple inventory totals**

Inventory log by job, by shift, by week.

- **Collect recipe reports**

Up to 1000 recipes can be logged for viewing and analysis.

- **Download batch statistics**

Prove the integrity of your blends by continuously logging every batch.

- **Email alarms to key people**

Notify the right people, right now, for immediate action.

- **Powerful data-collection capabilities**

Make SQL reports of your own choosing and send them directly to your PC. Set up a report schedule that matches your need for information.

- **Info how you need it**

Connect directly to a PC or download to a thumb drive.
